

Tracking Activity by Area

Tracking a group of 29 students in a Practice program, I can see that most students have not yet started their work (RED).

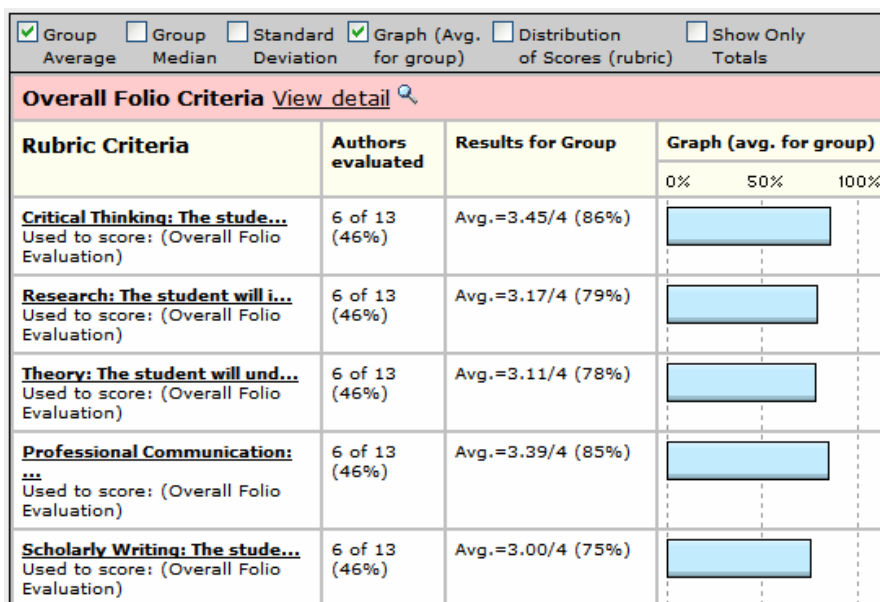

Although relatively little work has been sent back for revision, it appears that in *every part* of the Practice program there has been a need to return work to students (ORANGE).

Overall Folio Scores

For a group of 6 students, 100% have been evaluated with a rubric of 50 points. The mean score is 40.55 and the median score is 40.65, with SD of 4.85.

The blue bar places the group mean at a percentage score of 81%.

Break-down into the Program's Student Learning Outcomes shows means for a group of 6:

86%

79%

78%

85%

75%
(other outcomes not visible)

Drill Down to Student Level for Program Outcomes

Group means (displayed across bottom) are 86, 79, 78, 85, 75, 85.

We compare against a “cut-off” of 80% and a view of each student tells us more.

Under Scholarly Writing (2nd column from right), 4 out of 6 students are below cut-off.

If relying on mean scores (2nd column from left), we would see only 2 below cut-off.
